

Featuring Inter-connected Cooling Efficiency™

Airflow Panel Damper Options

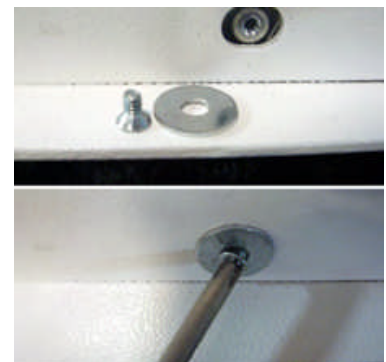

1. **Air Stratification Positioning:** To improve Upper Server cooling, position scoop of Hi-Plume fin towards source of air supply. To reduce Upper Server cooling, turn scoop of Hi-Plume fin away from source of air supply.

2. **Individual Air Baffle:** Baffles provide Low profile fit that Snap in & out.

3. **Opposed Blade Damper:** Opposed Blade Damper may be field mounted by rotating butterfly tab or using threaded screw to engage frame insert. Dampers adjusted from top surface to exact desired setting.

4. **Slide Damper:** Slide damper mounts the same as OPD and adjusts from top surface.
